

Cebuana Lhuillier Parking App — User Guide

Step-by-step instructions for every user type

This guide covers all three roles in the parking system: **Employee (User)**, **Parking Attendant**, and **Administrator**. Find your role below and follow the steps.

Getting Started (All Users)

How to Log In

1. Open the parking app in your web browser.
2. On the **Login** screen, enter your **email address** and **password**.
3. Click **Sign In**.
4. If this is your first login (or an admin reset your password), you will be taken to the **Change Password** screen. Set a new password, then continue.

Password rules: at least 8 characters, with at least one uppercase letter, one lowercase letter, and one digit.

If You Forgot Your Password

1. On the **Login** screen, click **Forgot Password**.
2. Enter your email address and submit.
3. Your administrator is notified to reset your password. They will provide you with a temporary password.
4. Log in with the temporary password; you will be prompted to set a new one.

How to Log Out

1. Open the menu (top-right of the screen).
 2. Click **Log Out**.
-

Part 1 — Employee (User) Guide

As an employee, you can register your vehicles, book parking slots, manage your reservations, and join a waitlist when a building is full.

1.1 Register a Vehicle (do this first)

You must have at least one vehicle registered before you can book parking.

1. From the menu, go to **My Vehicles**.
2. Click **Add Vehicle**.

3. Enter the **plate number, make, model, and color**.
4. Click **Save**.

Notes:

- Each plate number can only be registered once across the whole system.
- You cannot delete a vehicle that has an active or upcoming reservation — cancel the reservation first.

1.2 Book a Parking Slot

1. From the menu, go to **Book Parking**.
2. Select the **building** where you want to park.
3. Select the **floor** — you will see a timeline of each slot's availability for the day.
4. Pick an **available slot**.
5. Choose the **date(s)**. You can select up to 7 dates in a single booking.
6. Set the **start time** and **end time** (end time must be after start time).
7. Choose the **vehicle** you will park.
8. Click **Confirm Booking**.

Your reservation is created with status **Pending** and a **QR code** is generated for check-in.

Important booking rules:

- You may only book buildings within your assigned zone or your main building.
- Booking outside your main building is limited to a **single day** and requires a **reason** (unless you are tagged VIP or Group Head).
- Some buildings are restricted to employees whose main building is set to that location.
- Some buildings use a **dedicated-slot policy**, which may require a parking sticker or a slot registered to your specific vehicle.

1.3 Check In to Your Reservation

Depending on the building's settings, check-in works one of two ways:

Self check-in (when attendant mode is off):

1. Go to **My Reservations**.
2. Open the reservation for today.
3. Click **Check In**. This is only allowed from your start time until the check-in window closes (a few minutes after start).

Attendant check-in (when attendant mode is on):

1. Go to **My Reservations** and open the reservation.
2. Show the **QR code** to the parking attendant on arrival. They will scan it to confirm you.

1.4 View and Manage Your Reservations

1. From the menu, go to **My Reservations**.
2. Review the list showing building, slot, date, time, and status.
3. To view the entry QR code, open a reservation and tap **Show QR Code**.
4. To cancel, open the reservation and click **Cancel**. You cannot cancel a reservation whose date is already in the past.

Reservation statuses: **Pending**, **Confirmed** (checked in), **Cancelled**, **Completed**, **No-Show**.

1.5 Join a Waitlist (when a building is full)

If a building has no slots for your date and the waitlist is enabled:

1. On the **Book Parking** screen, choose the full building and date.
2. Click **Join Waitlist** and confirm your preferred time window.
3. When a slot frees up (someone cancels or is a no-show), the next person on the waitlist is notified in-app.
4. When you get the "Parking Slot Available!" notification, go to **Book Parking** and book within the time window shown (typically 15 minutes).
5. To leave the waitlist, open the waitlist entry and click **Leave Waitlist**.

1.6 Set Your Profile and Booking Preferences

1. From the menu, go to **Profile**.
 2. Set your **default start time** and **default end time** so bookings pre-fill automatically.
 3. Save your changes.
-

Part 2 — Parking Attendant Guide

As an attendant, you confirm arrivals, scan QR codes, view the day's reservations for your assigned buildings, and report no-shows.

2.1 View Today's Reservations

1. Log in and open the **Attendant** dashboard.
2. The **Daily Reservations** list shows today's bookings for your assigned building(s).
3. Use the **date** picker to view another day, and the **building** filter if you cover more than one building.

2.2 Confirm an Arrival by Scanning a QR Code

1. Open the **Scan** screen.
2. Ask the driver to show their reservation **QR code**.

3. Scan the code. The system shows the reservation details: driver name, plate number, slot, floor, building, date, and time.
4. Verify the details match the vehicle, then confirm.
5. Optionally, capture a **photo** during confirmation for the record.

The reservation status changes to **Confirmed**.

2.3 Confirm an Arrival Manually

1. On the **Daily Reservations** list, find the reservation.
2. Click **Confirm**. Optionally attach a photo.

2.4 Report a No-Show

Report a no-show when a driver does not arrive.

1. Find the reservation on the **Daily Reservations** list.
2. Click **Report No-Show**.
3. The reservation is marked **No-Show**, the driver is notified, and their no-show count increases.

Rules:

- You can only report a no-show for a **Pending** or **Confirmed** reservation.
 - You cannot report a no-show for a **future** date.
-

Part 3 — Administrator Guide

As an administrator, you manage users, buildings, zones, parking configuration, policies, attendants, reports, and site content.

3.1 Manage Users

1. Go to **Admin** → **User Management**.
2. To add a user, click **Add User** and enter email, name, company, role, and initial password. Assign buildings, a main building, and tags (e.g., VIP, Group Head) as needed.
3. To edit a user, open their record and update the fields.
4. To reset a password, open the user and click **Reset Password**; provide the temporary password to the user.
5. To block or unblock a user, toggle **Blocked**. Blocked users cannot log in or book.
6. Use bulk actions to set a **main building** or **assign a zone** for many users at once.

3.2 Manage Buildings and Floors

1. Go to **Admin** → **Building Management**.
2. Click **Add Building** and enter its name and details.

3. Within a building, add **floors** and define **parking slots** (labels and statuses).

3.3 Configure Parking for a Building

1. Go to **Admin** → **Parking Configuration**.
2. Select the building.
3. Set options such as **main-building exclusivity**, **waitlist enabled**, and the **waitlist notification window** (minutes).
4. Save.

3.4 Set Building Policies

1. Go to **Admin** → **Building Policies**.
2. Choose a building and enable a policy.
3. For a **dedicated-slot** policy, configure whether a **sticker** is required and which floors are **open** (no fixed slot assignment).
4. Save.

3.5 Manage Zones

1. Go to **Admin** → **Zone Management**.
2. Create a zone and assign one or more **buildings** to it.
3. Assign **users** to the zone. Users can only book buildings within their zone (plus their main building).

3.6 Manage Attendants

1. Go to **Admin** → **Attendant Management**.
2. Create or edit attendant accounts.
3. Assign each attendant the **building(s)** they are responsible for. Attendants only see reservations for their assigned buildings.

3.7 Event Blocking

1. Go to **Admin** → **Event Blocking**.
2. Block out slots, floors, or a building for a date range (e.g., for an event or maintenance) so they cannot be booked.

3.8 View Reports

1. Go to **Admin** → **Reports**.
2. Review usage, occupancy, no-show, and booking statistics.
3. Export data where available for offline analysis.

3.9 Manage Reservations (Admin View)

1. Go to **Admin** → **Reservations**.
2. View and filter all reservations across buildings by building, date, and status.

3.10 Site Content and Settings

1. Go to **Admin** → **Settings** to manage system-wide settings.
 2. Use the site-content tools to update in-app text and the built-in **Documentation** page.
-

Appendix — Reference

Roles at a Glance

Role	Can do
Employee (User)	Register vehicles, book slots, check in, cancel, join waitlist, set preferences
Attendant	View daily reservations for assigned buildings, scan QR, confirm arrivals, report no-shows
Administrator	Manage users, buildings, floors, slots, zones, attendants, policies, config, event blocks, reports, settings

Reservation Status Meanings

Status	Meaning
Pending	Booked but not yet checked in
Confirmed	Driver checked in / arrival confirmed
Cancelled	Reservation was cancelled
Completed	Reservation finished normally
No-Show	Driver did not arrive and was reported

Common Rules and Limits

- Up to **7 dates** per booking.
- Off-main-building bookings: **1 day** and a **reason** required (unless VIP/Group Head).
- Plate numbers are **unique** system-wide.
- Cannot delete a vehicle with an active/upcoming reservation.
- Cannot cancel a **past** reservation.
- Self check-in only works within the check-in window after the start time, and only when attendant mode is off.
