

Test Scripts

Project: Cebuana Lhuillier Parking Reservation System
Version: 2.1
Date: March 5, 2026
Related: [Test Plan](#) | [Test Results](#)

1. Unit Test Cases

1.1 Authentication Module

TC ID	Test Case	Input	Expected Result	Priority
TC-AUTH-01	Login with valid credentials	email: admin.test@cebuana.com, password: Test123!	200 OK, JWT cookie set, user object returned with correct role	P0
TC-AUTH-02	Login with invalid password	email: admin.test@cebuana.com, password: wrong	401 "Invalid credentials"	P0
TC-AUTH-03	Login with non-existent email	email: none@test.com, password: any	401 "Invalid credentials"	P0
TC-AUTH-04	Login rate limiting (>5 attempts/min)	6 rapid login attempts	429 Rate limit exceeded on 6th attempt	P1
TC-AUTH-05	Get current user (/auth/me)	Valid auth cookie	200 OK with user profile (id, role, main_building, tags)	P0
TC-AUTH-06	Get current user without auth	No cookie	401 Unauthorized	P0
TC-AUTH-07	Logout	Valid auth cookie	200 OK, cookie cleared, session revoked in DB	P0
				P0

TC ID	Test Case	Input	Expected Result	Priority
TC-AUTH-08	Change password (with current password verification)	<code>current_password: Test123!, new_password: NewPass123!</code>	200 OK, <code>must_change_password</code> cleared, new password hash stored	
TC-AUTH-09	Session expiry after 30 minutes	Token with expired <code>exp</code> claim	401 Unauthorized	P1
TC-AUTH-10	Device fingerprint mismatch	Valid token but different User-Agent	401 Session fingerprint mismatch	P1
TC-AUTH-11	Change password with wrong current password	<code>current_password: WrongPass!, new_password: NewPass123!</code>	400 "Current password is incorrect"	P0
TC-AUTH-12	Forgot password (existing email)	<code>email: user.test@cebuana.com</code>	200 OK (always), admin notification created	P1
TC-AUTH-13	Forgot password (non-existent email)	<code>email: noone@nowhere.com</code>	200 OK (prevents email enumeration), no notification created	P1
TC-AUTH-14	Same-password prevention (self-service change)	<code>current_password: Test123!, new_password: Test123!</code>	400 "New password cannot be the same as your current password"	P0
TC-AUTH-15	Blocked user login attempt	Block user via admin → attempt login with valid credentials	403 "Your account has been blocked. Please contact your administrator."	P0
TC-AUTH-16	Empty email on login	Submit login form with blank email field	Browser field validation or toast "Please enter your email address"; form does not submit to API	P1
			Browser field validation or toast "Please enter your	P1

TC ID	Test Case	Input	Expected Result	Priority
TC-AUTH-17	Empty password on login	Submit login form with blank password field	password"; form does not submit to API	

1.2 Vehicle Management

TC ID	Test Case	Input	Expected Result	Priority
TC-VEH-01	Create vehicle	<code>plate_number: ABC-1234,</code> <code>make: Toyota, model: Vios,</code> <code>color: White</code>	200 OK, vehicle created with user_id	P0
TC-VEH-02	List user vehicles	Authenticated user	Array of vehicles belonging to user only	P0
TC-VEH-03	Delete vehicle	Valid vehicle_id owned by user	200 OK, vehicle removed	P1
TC-VEH-04	Delete vehicle owned by another user	Vehicle ID of another user	403 or 404	P1
TC-VEH-05	Create vehicle with duplicate plate	Plate already registered to another vehicle	400 "Plate number X is already registered to another vehicle"	P0
TC-VEH-06	Create vehicle with unique plate	New unique plate number	200 OK, vehicle created	P0
TC-VEH-07	Create vehicle with plate < 2 chars	<code>plate_number: "A"</code>	422 "Plate number must be at least 2 characters"	P0
TC-VEH-08	Create vehicle with plate > 15 chars	<code>plate_number:</code> <code>"ABCDEFGHijklmnop"</code>	422 "Plate number must not exceed 15 characters"	P0

1.3 Reservation Management

TC ID	Test Case	Input	Expected Result	Priority
				P0

TC ID	Test Case	Input	Expected Result	Priority
TC-RES-01	Create single-date reservation	<code>slot_id, vehicle_id, dates: ["2026-02-25"], start_time: "08:00", end_time: "18:00"</code>	200 OK, reservation with QR token, status: pending	
TC-RES-02	Create multi-date reservation	<code>dates: ["2026-02-25", "2026-02-26", "2026-02-27"]</code>	200 OK, 3 reservations created	P0
TC-RES-03	Book already-reserved slot	Same slot_id + date as existing active reservation	400 "Slot already reserved for {date}"	P0
TC-RES-04	Book with overlapping time	Same date, overlapping start/end times	400 "You already have a booking that overlaps"	P0
TC-RES-05	Book more than 7 dates	<code>dates: [8 dates]</code>	400 "Maximum 7 dates allowed per booking"	P1
TC-RES-06	Book with no dates	<code>dates: []</code>	400 "At least one date is required"	P1
TC-RES-07	Book as blocked user	Blocked user auth	403 "Your account has been blocked"	P0
TC-RES-08	Cancel reservation	Valid reservation_id	200 OK, status changed to "cancelled"	P0
TC-RES-09	Cancel another user's reservation	Reservation belonging to different user	404 (user-scoped query)	P1
TC-RES-10	Get QR code	Valid reservation_id	200 OK with base64 QR image and qr_token	P1
TC-RES-11	End time before start time	<code>start_time: "18:00", end_time: "08:00"</code>	400 "End time must be after start time"	P1

1.4 Zone & Building Rules

TC ID	Test Case	Input	Expected Result	Priority
TC-ZONE-01	Book in main building	User's main_building matches booking building	200 OK, no extra validation	P0

TC ID	Test Case	Input	Expected Result	Priority
TC-ZONE-02	Book in zone building (non-main), single day	Different building in user's zone, 1 date, with reason	200 OK	P0
TC-ZONE-03	Book in zone building, multi-day (non-VIP)	Different building, 2+ dates	400 "limited to a single day only"	P0
TC-ZONE-04	Book in zone building without reason	Different building, no reason	400 "A reason is required"	P0
TC-ZONE-05	Book outside zone	Building not in user's zone	403 "not assigned to this building's zone"	P0
TC-ZONE-06	VIP books multi-day in non-main building	VIP user, 2+ dates in zone building	200 OK (VIP bypass)	P1

1.5 Admin — User Management

TC ID	Test Case	Input	Expected Result	Priority
TC-ADM-01	Create user (admin only)	User data with all fields	200 OK, user created with <code>must_change_password: true</code>	P0
TC-ADM-02	Create user with duplicate email	Existing email	400 "Email already registered"	P0
TC-ADM-03	Non-admin create user	User role auth	403 Forbidden	P0
TC-ADM-04	Block user	Valid user_id	200 OK, user.is_blocked = true	P1
TC-ADM-05	Block admin user	Admin user_id	400 "Cannot block an admin user"	P1
TC-ADM-06	Unblock user	Blocked user_id	200 OK, user.is_blocked = false	P1
TC-ADM-07	Reset password	<code>user_id, password: NewTemp!</code>	200 OK, <code>must_change_password: true</code>	P1

TC ID	Test Case	Input	Expected Result	Priority
TC-ADM-08	Update user tags	<code>tags: ["vip", "group_head"]</code>	200 OK, tags updated	P1
TC-ADM-09	Invalid tag	<code>tags: ["invalid_tag"]</code>	400 "Invalid tags"	P1
TC-ADM-10	Bulk set main building	<code>user_ids: [...], main_building: building_id</code>	200 OK with modified count	P1
TC-ADM-11	Bulk assign zone	<code>user_ids: [...], zone_id: zone_id</code>	200 OK, users added to zone	P1

1.6 Admin — Bulk Upload

TC ID	Test Case	Input	Expected Result	Priority
TC-BULK-01	Upload valid CSV	CSV with email, first_name, last_name	200 OK, users created	P0
TC-BULK-02	Upload CSV with existing emails	CSV with duplicate emails	Skipped count > 0, no errors	P0
TC-BULK-03	Upload CSV with main_building column	CSV with building name	Building name resolved to ID	P1
TC-BULK-04	Upload CSV with zone column	CSV with zone name	Zone assignment performed (\$addToSet)	P1
TC-BULK-05	Upload CSV with invalid building name	Nonexistent building name	Error reported in response	P1
TC-BULK-06	Upload CSV missing required column	CSV without email column	400 "Missing required column: email"	P0
TC-BULK-07	Upload non-CSV file	.txt file	400 "File must be CSV or Excel"	P1
TC-BULK-08	Download user template	GET /api/templates/users	CSV with correct columns (email, first_name, last_name, company, role,	P2

TC ID	Test Case	Input	Expected Result	Priority
			job_family, main_building, zone) and example rows	

1.7 Building & Slot Management

TC ID	Test Case	Input	Expected Result	Priority
TC-BLD-01	Create building	name, address, total_floors, slots_per_floor	Building + floors + slots created	P0
TC-BLD-02	Delete building	Valid building_id	Building, floors, and slots all deleted	P1
TC-BLD-03	Add floor to building	label, slot_count	Floor created with slots	P0
TC-BLD-04	Upload floor layout	Image file (PNG/JPG)	200 OK, layout_image_url set	P1
TC-BLD-05	Upload non-image file	.txt file	400 "File must be an image"	P1
TC-BLD-06	Upload file >10MB	Large image	400 "File too large"	P2
TC-BLD-07	Set slot to maintenance	status: maintenance	Slot excluded from availability	P1
TC-BLD-08	Maintenance slot with active reservation	Slot has pending reservation	400 "Cannot block a slot with active reservations"	P1
TC-BLD-09	Delete slot with active reservation	Slot has pending reservation	400 "Cannot delete slot with active reservations"	P1
TC-BLD-10	Get available slots	building_id, date, floor_id	Only available, non-maintenance, non-reserved slots	P0

1.8 Zone Management

TC ID	Test Case	Input	Expected Result	Priority
TC-ZN-01	Create zone	name, building_ids, user_ids	200 OK, zone created	P0

TC ID	Test Case	Input	Expected Result	Priority
TC-ZN-02	Update zone buildings	New building_ids	200 OK, buildings updated	P1
TC-ZN-03	Delete zone	Valid zone_id	200 OK, zone removed	P1
TC-ZN-04	Get user building assignments	Authenticated user	Building IDs from all assigned zones	P0

1.9 Parking Configuration

TC ID	Test Case	Input	Expected Result	Priority
TC-CFG-01	Save config (new)	<code>building_id,</code> <code>default_start_time,</code> <code>default_end_time,</code> <code>booking_window_days</code>	Config created	P0
TC-CFG-02	Update config (existing)	Same building_id with new values	Config updated (upsert)	P1
TC-CFG-03	Get config (default)	Building without config	Default values returned	P1
TC-CFG-04	Enable main building exclusivity	<code>main_building_exclusive:</code> <code>true</code> for building X	Config saved; non-assigned users get 403 on <code>POST /api/reservations</code>	P1
TC-CFG-05	Non-assigned user books exclusive building	User's <code>main_building</code> != building X (exclusivity enabled)	403 "This building is restricted to its assigned employees only"	P1
TC-CFG-06	Admin books exclusive building	Admin user, building X (exclusivity enabled)	200 OK (admins are exempt)	P1

1.10 Waitlist & Slot Timeline

TC ID	Test Case	Input	Expected Result	Priority
TC-WL-01	Get floor timeline	<code>building_id, floor_id, date</code>	Hourly timeline (6AM–10PM) per slot, with booked/available flags	P1
TC-WL-02	Join waitlist	<code>building_id, preferred_date, start_time, end_time</code>	200 OK, entry created with position	P1
TC-WL-03	Join waitlist (disabled)	Building without waitlist enabled	400 "Waitlist is not enabled"	P1
TC-WL-04	Join waitlist (duplicate)	Already on waitlist for same building+date	400 "already on the waitlist"	P1
TC-WL-05	Leave waitlist	Valid entry_id	200 OK, status set to cancelled	P1
TC-WL-06	Get waitlist status	<code>building_id, date</code> for user on waitlist	<code>on_waitlist: true</code> with entry details	P1
TC-WL-07	Get waitlist count	<code>building_id, date</code>	Count of waiting entries	P1
TC-WL-08	Admin get building waitlist	Admin auth, building_id	List of waitlist entries with user names	P1

1.11 Reports & AI Insights

TC ID	Test Case	Input	Expected Result	Priority
TC-RPT-01	Get stats (no filters)	Admin auth	Summary with totals, daily/building breakdown	P0
TC-RPT-02	Get stats with date filter	<code>start_date, end_date</code>	Filtered results	P1
TC-RPT-03	Get stats with building filter	<code>building_id</code>	Building-specific stats	P1
TC-RPT-04	Generate AI insight	Admin auth + valid API key	Markdown insight saved to DB	P2
TC-RPT-05	AI insight without API key	No EMERGENT_LLM_KEY	Graceful error message	P2

TC ID	Test Case	Input	Expected Result	Priority
TC-RPT-06	Get insights history	Admin auth	Array of past insights, sorted by date desc	P2
TC-RPT-07	Delete insight	Valid insight_id	200 OK, insight removed	P2

1.12 Attendant Operations

TC ID	Test Case	Input	Expected Result	Priority
TC-ATT-01	Get daily reservations	date=today, building_id=X	Reservations for that date + building	P0
TC-ATT-02	Confirm reservation	Valid reservation_id	Status changed to "confirmed"	P0
TC-ATT-03	Report no-show (today)	Reservation for today	Status: no_show, no_show_at timestamp recorded, no_show_count incremented, notification sent	P0
TC-ATT-04	Report no-show (future date)	Reservation for tomorrow	400 "Cannot report no-show for a future reservation"	P0
TC-ATT-05	Report no-show (already cancelled)	Cancelled reservation	400 "Cannot report no-show for a cancelled reservation"	P1
TC-ATT-06	QR scan lookup	Valid qr_token	Reservation details with user, vehicle, slot, building	P1
TC-ATT-07	QR scan invalid token	Random string	404 "Reservation not found"	P1

1.13 Notifications

TC ID	Test Case	Input	Expected Result	Priority
TC-NOTIF-01	Get notifications	Authenticated user	User's notifications, sorted desc	P1
TC-NOTIF-02	Get unread count	Authenticated user	{count: N}	P1
TC-NOTIF-03	Mark single as read	Valid notification_id	Notification.read = true	P1

TC ID	Test Case	Input	Expected Result	Priority
TC-NOTIF-04	Mark all as read	Authenticated user	All unread → read	P1

1.14 Site Content

TC ID	Test Case	Input	Expected Result	Priority
TC-SITE-01	Get site content (public)	No auth required	Default or custom content	P2
TC-SITE-02	Update site content	Admin auth, new heading/description	Content updated (upserted)	P2

1.15 Building Policies

TC ID	Test Case	Input	Expected Result	Priority
TC-POL-01	Create building policy	Admin auth, <code>building_id</code> , <code>policy_type</code> , <code>enabled</code> , <code>requires_sticker</code>	200 OK, policy created	P0
TC-POL-02	Book with registered vehicle (sticker building)	Vehicle plate matches active slot registration	200 OK, reservation created	P0
TC-POL-03	Book with unregistered vehicle (sticker building)	Vehicle plate has no registration in building	403 "Vehicle X does not have a parking sticker/registration"	P0
TC-POL-04	Book assigned slot with registered vehicle	Vehicle+user registered to specific slot	200 OK	P0
TC-POL-05	Book unassigned slot with registered vehicle (non-open floor)	Vehicle registered to different slot	403 "Vehicle X is not registered to this parking slot"	P0
TC-POL-06	Book any slot on open floor	Floor is in <code>open_floor_ids</code>	200 OK (no strict slot check)	P1
TC-POL-07	Create slot registration (max reached)	Slot already at <code>max_users_per_slot</code>	400 "This slot already has N registered users"	P1
		Same user+slot already active		P1

TC ID	Test Case	Input	Expected Result	Priority
TC-POL-08	Duplicate slot registration		400 "User is already registered to this slot"	

2. Integration Test Cases

TC ID	Test Case	Modules Involved	Steps	Expected Result	Priority
TC-INT-01	Full booking flow	Auth, Buildings, Vehicles, Reservations	Login → List buildings → Create vehicle → Get available slots → Book → Verify reservation	Reservation created with all enriched data	P0
TC-INT-02	No-show notification flow	Attendant, Reservations, Notifications	Create reservation → Report no-show → Check user notifications	Notification created with correct message	P0
TC-INT-03	Bulk upload with zone assignment	Users, Zones	Create zone → Upload CSV with zone column → Verify zone.user_ids updated	Users created and added to zone	P1
TC-INT-04	External booking with zone enforcement	Auth, Zones, Reservations	Assign user to zone → Book in non-main building → Verify single-day + reason enforced	Business rule enforced correctly	P0
TC-INT-05	Admin cancellation flow (with reason + notification)	Users (admin), Reservations, Notifications	Admin cancels reservation with reason field → Verify status change → Verify user receives notification with reason	Reservation cancelled, parker receives in-app notification containing cancellation reason	P0
TC-INT-06	Session lifecycle	Auth	Login → Use token → Logout → Reuse token	Token invalid after logout	P0

TC ID	Test Case	Modules Involved	Steps	Expected Result	Priority
				(session revoked)	
TC-INT-07	Slot maintenance lifecycle	Buildings, Reservations	Set slot to maintenance → Verify not available → Remove maintenance → Verify available	Slot availability reflects status	P1
TC-INT-08	Waitlist notification flow	Waitlist, Reservations, Notifications	Join waitlist → Cancel reservation (triggers slot available) → Verify waitlist user notified	Next waitlisted user receives notification with booking window	P1
TC-INT-09	No-show slot release timing	Attendant, Reservations, Config	Report no-show → Check no_show_at recorded → Wait for release_minutes → Verify slot released	Slot released based on no_show_at + config minutes	P1
TC-INT-10	Vehicle-level policy enforcement	Vehicles, Building Policies, Reservations	Register vehicle → Create slot registration → Book with registered vehicle (pass) → Book with different vehicle (fail)	Only the specific registered vehicle can book the slot	P0
TC-INT-11	Plate uniqueness across users	Vehicles, Auth	User A registers plate X → User B tries to register same plate X	400 error for User B, plate uniqueness enforced	P0
TC-INT-12	Event block prevents double-booking	Event Blocks, Reservations	Admin creates event block for slot S → Regular user tries to book slot S for same time	Slot appears as unavailable; booking rejected	P0
TC-INT-13	Main building exclusivity enforcement	Parking Config, Users, Reservations	Enable exclusivity for building B → User without B as main_building tries to book → Verify rejection	403 error for non-assigned user; admin can still book	P1

3. UI Test Cases

TC ID	Test Case	Page	Steps	Expected Result	Priority
TC-UI-01	Login page renders	<code>/login</code>	Navigate to login	Email/password form, submit button, branding visible	P0
TC-UI-02	Login success redirect	<code>/login</code>	Enter valid credentials → Submit	Redirect to role-appropriate dashboard	P0
TC-UI-03	User dashboard loads	<code>/dashboard</code>	Login as user	Stats cards, vehicles, reservations tabs visible	P0
TC-UI-04	Booking page flow	<code>/book</code>	Select building → floor → dates → slot → vehicle → submit	Reservation confirmed, QR shown	P0
TC-UI-05	Admin dashboard loads	<code>/admin</code>	Login as admin	Stats cards, charts, building breakdown visible	P0
TC-UI-06	User management table	<code>/admin/users</code>	Navigate to user management	User table with filters, checkboxes, action buttons	P0
TC-UI-07	Bulk upload dialog	<code>/admin/users</code>	Click bulk upload → Select file → Submit	Upload summary displayed	P1
TC-UI-08	Building management	<code>/admin/buildings</code>	Navigate to buildings	Building cards with floors and slots	P1
TC-UI-09	Attendant dashboard	<code>/attendant</code>	Login as attendant	Date picker, building filter, reservation cards, summary cards	P0
TC-UI-10	No-show button	<code>/attendant</code>	Navigate to future date	"Confirm" and "No Show"	P0

TC ID	Test Case	Page	Steps	Expected Result	Priority
	hidden for future			buttons not visible	
TC-UI-11	Today button on attendant	<code>/attendant</code>	Navigate to different date	"Today" button appears; clicking returns to today	P1
TC-UI-12	Notification bell	Any authenticated page	Check header	Bell icon with unread count badge	P1
TC-UI-13	Mobile responsive layout	<code>/dashboard</code>	Set viewport to 375px width	Layout adapts, bottom navigation visible	P1
TC-UI-14	Force password change	<code>/login</code>	Login with <code>must_change_password: true</code>	Password change dialog appears, blocks navigation	P0
TC-UI-15	Hourly timeline on booking	<code>/book</code>	Select building → floor → date → slot	Hourly timeline grid appears showing booked/ available hours	P1
TC-UI-16	Waitlist join button	<code>/book</code>	Navigate to fully booked building+date	"Join Waitlist" option visible	P1
TC-UI-17	Job Family in user form	<code>/admin/users</code>	Click "Add User" or edit user	Job Family field visible in the form	P1
TC-UI-18	Change password on profile	<code>/profile</code>	Login → Navigate to Profile → Fill change password form with current + new password → Submit	Password updated, success toast shown	P1
TC-UI-19	Forgot password link on login	<code>/login</code>	Click "Forgot Password?"	ForgotPassword modal/form appears; submit email	P1
TC-UI-20	Event blocking admin page	<code>/admin/event-blocking</code>	Login as admin → Navigate to Event Blocking	Slot map and event block form visible;	P0

TC ID	Test Case	Page	Steps	Expected Result	Priority
				existing blocks listed	
TC-UI-21	Admin cancellation reason dialog	<code>/admin/reservations</code>	Click Cancel on a reservation	Modal prompts for cancellation reason; reason required before submit	P0
TC-UI-22	Main building exclusivity toggle	<code>/admin/parking-config</code>	Select building with exclusivity → Toggle on	Toggle saved; info text about restriction appears	P1

1.16 Event Blocking

TC ID	Test Case	Input	Expected Result	Priority
TC-EVT-01	Create event block	Admin auth, <code>event_name, reason, building_id, floor_id, slot_ids: [slot1, slot2], date, start_time, end_time</code>	200 OK, event_block created with reservation_ids for each slot; reservations have <code>booking_type: event_block</code>	P0
TC-EVT-02	List event blocks	Admin auth	Array of event blocks with enriched slot/building/floor info	P1
TC-EVT-03	Delete event block	Valid event_block_id	200 OK; event block removed; all associated reservations deleted; slots freed	P0
TC-EVT-04	Create event block for already-booked slot	Slot with active reservation	400 "Slot X is already reserved for the selected date/time"	P1
TC-EVT-05	Non-admin creates event block	User role auth	403 Forbidden	P0

1.17 User Management Filters & Search

TC ID	Test Case	Input	Expected Result	Priority
TC-USR-FLT-01	Filter by Role	Select "user" from Role dropdown	Only users with role=user displayed; admins and attendants hidden	P1
TC-USR-FLT-02	Filter by Company	Select a company from Company dropdown	Only users belonging to selected company displayed	P1
TC-USR-FLT-03	Filter by Zone	Select a zone from Zone dropdown	Only users in the selected zone displayed	P1
TC-USR-FLT-04	Filter by Main Building	Select a building from Main Building dropdown	Only users with matching main_building displayed	P1
TC-USR-FLT-05	Multiple filters simultaneously	Role=user + Company=Cebuana	Results satisfy all selected filter criteria	P1
TC-USR-FLT-06	Search by full name	Enter "Juan Dela Cruz"	Returns all users whose combined first + last name contains the search term	P0
TC-USR-FLT-07	Search by partial name	Enter "Juan"	Returns all users with "Juan" in first name, last name, or full name	P1

1.18 Admin Dashboard Counts

TC ID	Test Case	Input	Expected Result	Priority
TC-DASH-01	Total users count accuracy	Compare dashboard stat vs <code>GET /api/users</code> count	Dashboard total_users equals actual count in users collection	P1
TC-DASH-02	Total buildings count accuracy	Compare dashboard stat vs <code>GET /api/buildings</code> count	Dashboard buildings_count equals actual count in buildings collection	P1
TC-DASH-03	Dashboard loads without auth error	Login as admin, navigate to <code>/admin</code>	Dashboard page loads; all stat cards visible; no	P0

TC ID	Test Case	Input	Expected Result	Priority
			"Invalid credentials" shown	
TC-DASH-04	No unknown buildings in chart	<code>GET /api/reports/stats</code> building_breakdown	No entries with <code>building_name == "Unknown"</code> in the breakdown array	P1

4. Performance Test Cases

TC ID	Test Case	Metric	Target	Method	Priority
TC-PERF-01	Login API response time	Latency	< 300ms	<code>curl -w "%{time_total}%"</code>	P1
TC-PERF-02	Get buildings response time	Latency	< 500ms	Timed API call	P1
TC-PERF-03	Available slots response time	Latency	< 300ms	Timed API call with filters	P1
TC-PERF-04	Admin stats response time	Latency	< 500ms	Timed API call	P1
TC-PERF-05	Create reservation response time	Latency	< 500ms	Timed API call	P1
TC-PERF-06	Frontend initial load	Page load	< 3s	Playwright timing	P1
TC-PERF-07	Dashboard data fetch	Total fetch	< 2s	<code>Promise.allSettled</code> timing	P2

5. Security Test Cases

TC ID	Test Case	Category	Steps	Expected Result	Priority
TC-SEC-01	Access admin endpoint as user	Authorization	Login as user → Call <code>GET /api/users</code>	403 Forbidden	P0
TC-SEC-02		Authorization	Login as attendant →	403 Forbidden	P0

TC ID	Test Case	Category	Steps	Expected Result	Priority
	Access admin endpoint as attendant		Call <code>POST /api/users</code>		
TC-SEC-03	Access without authentication	Authentication	Call any protected endpoint without cookie	401 Unauthorized	P0
TC-SEC-04	Expired JWT token	Authentication	Use token older than 30 minutes	401 Unauthorized	P0
TC-SEC-05	Revoked session	Authentication	Logout → Reuse old token	401 Session expired	P1
TC-SEC-06	Security headers present	Transport	Check response headers on any request	CSP, HSTS, X-Frame-Options, X-Content-Type-Options all present	P0
TC-SEC-07	HttpOnly cookie flag	Transport	Inspect Set-Cookie header	<code>HttpOnly;</code> <code>Secure;</code> <code>SameSite=Lax</code>	P0
TC-SEC-08	Rate limiting on login	Abuse Prevention	6 rapid login attempts	429 on 6th attempt	P1
TC-SEC-09	Path traversal on file upload	Injection	Upload file with <code>../../../../</code> in name	Filename sanitized, no traversal	P1
TC-SEC-10	XSS in user input	Injection	Create user with <code><script></code> in name	Stored as plain text, not executed	P1
TC-SEC-11	SQL/NoSQL injection in query	Injection	Pass <code>{"\$gt":""}</code> in query params	Validated by Pydantic, no injection	P1
TC-SEC-12	Blocked user login attempt	Access Control	Block user → Attempt login	Login rejected	P0

6. March 2026 Bug Fix Test Cases

6.1 Attendant Management

TC ID	Test Case	Input	Expected Result	Priority
TCID-PARKING-ATTENDANT-001	No-Show button hidden for confirmed bookings	Booking with <code>status: confirmed</code>	No-Show button not visible/ clickable	P0
TCID-ATTENDANT-MANAGEMENT-007	Cannot create attendant without building	<code>role: attendant, assigned_buildings: []</code>	400 "Attendants must be assigned to at least one building"	P0
